THANK YOU TO OUR EVENT PARTNERS

Tumours should never be a child's normal.

Neurofibromatosis (NF) is a genetic condition that causes tumours to grow on nerves, under the skin and deep in the body, including the brain and spine. It is unpredictable, progressive and there is no cure. **But there is hope.** Whether you walk it or run it, this event will challenge you to overcome hurdles and crush kilometres whilst raising funds to support the Children's Tumour Foundation and those living with NF.
