CONQUER  
2KM 4KM  
OR 10KM

**NF tumours should never be a child's normal.**

Neurofibromatosis (NF) is a genetic condition that causes tumours to grow on nerves, under the skin and deep in the body, including the brain and spine. It is unpredictable, progressive and there is no cure. **But there is hope.** Whether you walk or run, this event invites you to conquer kilometers, and raise funds to support the Children's Tumour Foundation and individuals and families impacted by NF.
